# Introduction to programming

Programming is a way to talk to computers.
A language like Hindi, English or Bengali can be
used to talk to a human but for Computers
we need straight-forward instructions

Computer is Dumb!
When was the last time you ordered some cereal
and got DVDs of Serial?

Programming is the act of constructing a program, a
set of precise instructions telling a computer what
to do.

What is Ecmascript?
ECMA Script is a standard on which Javascript is based!
It was created to ensure that different documents
on javascript are actually talking about the same
language.

almost
Java Script & ECMA Script can always be used interchangably
Java Script is very liberal in what it allows.

How to execute Java Script?

JavaScript can be executed right inside one's browser. You can open the javascript console and start writing javascript there

Another way to execute javascript is a runtime like Node.js which can be installed and used to run javascript code.

Yet another way to execute javascript is by inserting it inside <script> tag of an HTML document.

Computer is Dumb!

When was the last time you ordered some cereal
and got DVDs of Serial?

Ok!

Cereal laa do
beta bhook
lagi hai

Ye to kaka!
DVDs of Serial

He Ram
